Fuel surcharge applies for all shipments send by Airlog Express Service. Due to the price variations on fuel, we have implemented a variable fuel surcharge equal to the surcharge we will get from our sub-contractors. Fuel surcharge will be charged to all our products.

Our booking system will automatically calculate the fuel surcharge, based on the actual date of the booking.

The fuel surcharge will be calculated on the basis of the average monthly development in the fuel costs, which is updated daily from the American Energy Department and "Rotterdam ARA index". The price will be listed in USD cents per US gallon. You can find more information by entering <http://www.eia.doe.gov> . Fuel surcharge will be adjusted every month.
